

**1 ACCESS THE WATER TANK**

- ◆ Remove the water fill plug.

**2 PREPARE TO FILL**

- ◆ Install the funnel.
- ◆ Fill a bucket with clean drinking water.

**3 POUR IN THE WATER**

**32 LITERS**

- ◆ Pour 32 liters of clean drinking water into the tank.
- ◆ You must look down into the fill tube while adding water so you can check the level. Use a stool if needed.

**4 CHECK THE WATER LEVEL**

- ◆ Fill the tank until the water is just touching the bottom of the fill tube.
- ◆ DO NOT INSERT SHARP OBJECTS INTO THE FILL TUBE.

**5 REMOVING WATER**

- ◆ To remove excess water, or to empty the tank, use a siphon hose.

**6 SEAL THE WATER TANK**

- ◆ Replace and tighten the water fill plug. The top of the plug must not stick out above the lid surface.

**! WARNING: DO NOT INSERT SHARP OBJECTS**

**! WARNING: DRAIN REFRIGERATOR BEFORE MOVING**

- ◆ Empty the water from the tank as in Step 5.
- ◆ Be sure to refill the refrigerator with clean drinking water according to the steps above BEFORE plugging MetaFridge into power source.

**! WARNING: CHECK WATER LEVEL EVERY YEAR**

- ◆ Access the water tank and check the water level as in Step 4.
- ◆ If water is low, add more.
